Richerson or equal	23"x26" drawing clipboard (2 clips with handles)

Notes:

* A quality parallel ruler will cost anywhere from \$50.00 to \$120. A good parallel ruler is a smart investment, (usually has metal rollers on the underside) and should stay with you into your professional career, as should most of your architectural supplies; the school will provide you with a drawing board.

** Students are not required to purchase the technical pens until mid-semester. They may choose to complete their drawing digitally.

*** Three-ring binder shall be used to organize class assignments and to keep notes on class lectures and instructions. Journals shall be used for field sketching, design sketches and notes taken at reviews and lectures.

**** Paper and mylar will need to be purchased on an as-needed-basis. The quantities listed above are to get you started for the start of first semester classes.

Students will be asked to purchase additional (expendable) supplies for freehand drawing in the Spring semester. All equipment supplies will be purchased only once.

Below you may find suggested local stores that have Supply Kits ready to be pre-ordered. They will deliver the kits to campus during Open House.

Local Stores
