

SPRING 2019

DRAWING & MEDIA WORKSHOP

Introduction of major softwares in full capacity so students would be able to accomplish all assignments from Design course and Visual Representation course.

Production of graphically effective Analytical and Architectural Diagrams.

Students will be aware of the full range of strategies and techniques to design and implement a complete and accurate visual architectural presentation.

Students will learn to visually represent existing conditions and the problems given by the Project in diagram form.

This would include perspective studies as well as effective graphic design representation of the program, parti diagrams, materials and the site plan design itself.

Students will learn full techniques of 3D modeling and renderings.
